

STOP ABORTION NOW!!!

An Essay by a Ten-Year-Old Boy

28 November 2024

What would you think if you were a pregnant woman just sitting in a chair all day long, just looking at your tummy, and just saying in your head “What have I done?” The answer to the question is something unspeakable. Many countries such as the U.S believe in abortion and THAT IS NOT OKAY!!! Here’s why.

“Why is it NOT OKAY?” First of all, do you know what abortion is? The definition of abortion is to use certain drugs or procedures to kill a baby in the womb. Does that sound good to you? For example, what if someone just ran into your house and killed you, and you don’t want to be killed right? Because if you say yes you’re crazy!! So do you think the baby wants to be killed? The answer is NO.

These days, most abortions are caused by dangerous drugs. The mother typically has a lot of anxiety and regret. Did you know that mothers who have started an abortion have a very good chance of saving the baby using abortion pill reversal. We can save babies by using a natural hormone to reverse the drug in the mom’s body so the baby can be a happy baby and live it’s life. About a million babies have been aborted each year in America which is REALLY, REALLY BAD!!! So maybe you can be a part of Steno Institute an organization that saves babies using science. Sounds cool right!! Just follow stenoinstitute.org. So go ahead and click the underlined URL to see.

I am 10 years old and my name is Augustine Sumner Chism, grandson of George Delgado who founded Steno Institute and I have been more than happy to share this message with you about why we should stop abortion. In conclusion, just know that the LORD SAID, LOVE YOUR NEIGHBOR AS YOURSELF!!! (and have a great day!) Never forget, you can help stop abortion in this community.
